

## Manual de instalação

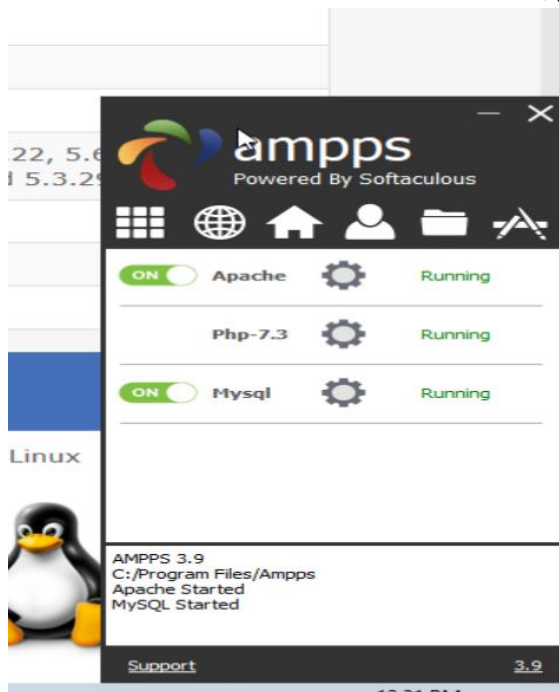

1. Instalação de servidor local com o serviço Ampps, pode ser obtido no [ampps.com/downloads](https://ampps.com/downloads)

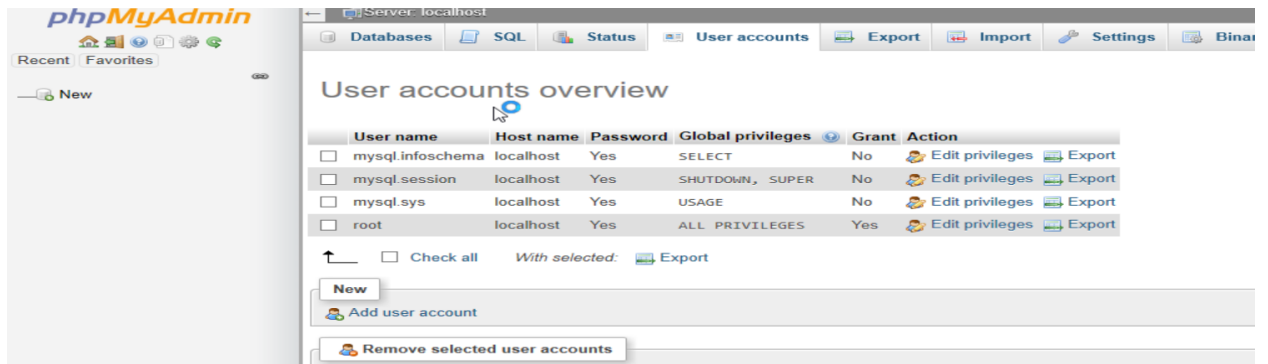

The screenshot shows the Ampps website's download page. At the top, there's a navigation bar with links like Client Area, Support, Downloads, Contact, News, Blog, Forums, and Company. Below this, the page title "Downloads" is displayed. A message states: "You must read and fully understand the License agreement before you download and use this software." A table titled "Current Version : 3.8" lists the included software and their versions for Windows, MacOS X(64Bit), and Linux. Below the table, there's a section titled "Download Ampps 3.9" with three buttons for Windows, MAC OS X, and Linux, each accompanied by its respective logo (Windows logo, Apple logo, and Tux penguin logo).

Includes	Windows	MacOS X(64Bit)	Linux

6. Fazemos download do projeto no boton verde:

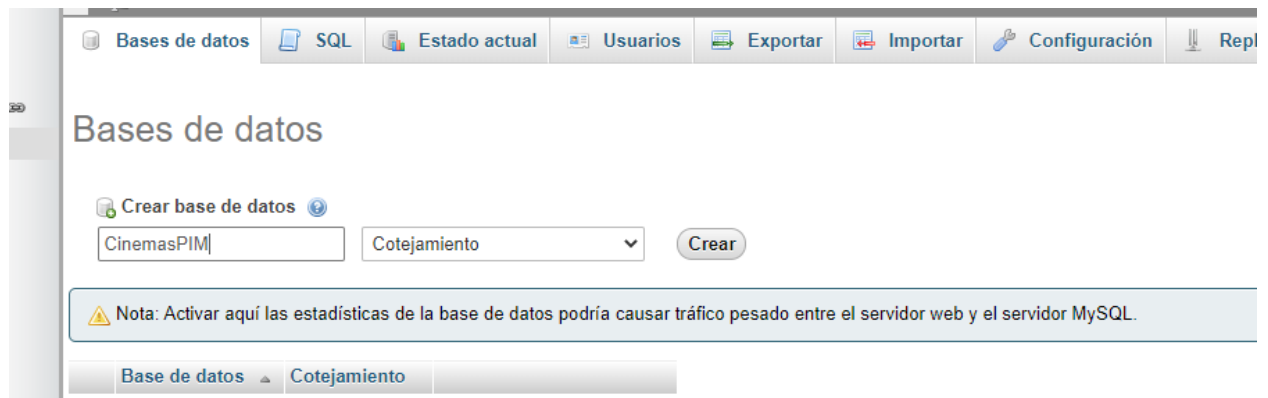

7. Descomprimos o arquivo rar que foi baixado dentro de nossa maquina

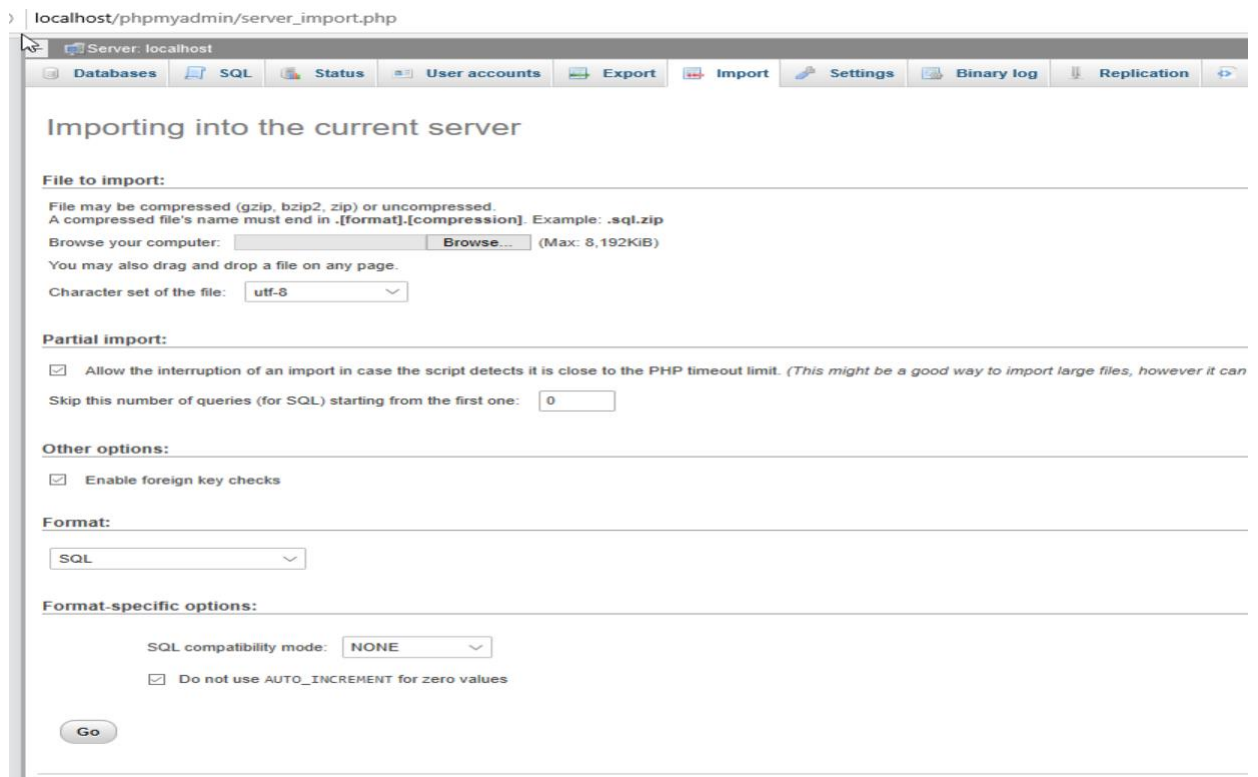

8. Accesmos a pasta sqlConfig onde salvamos os arquivos da base de dados.

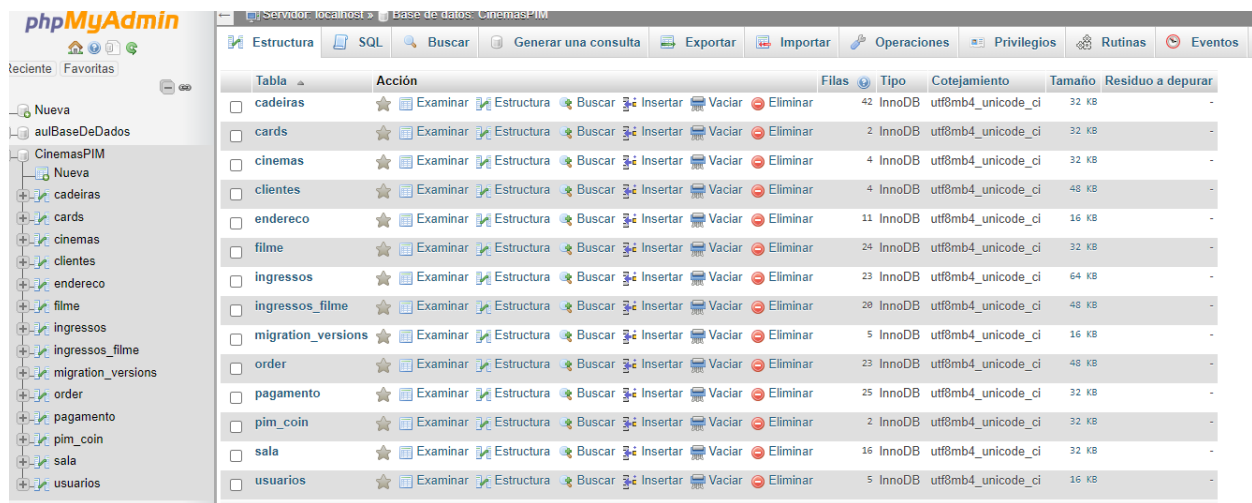

9. Voltamos ao phpMyadmin na seção de Bases de dados y fazemos a criação da base de dados com o nome CinemasPIM

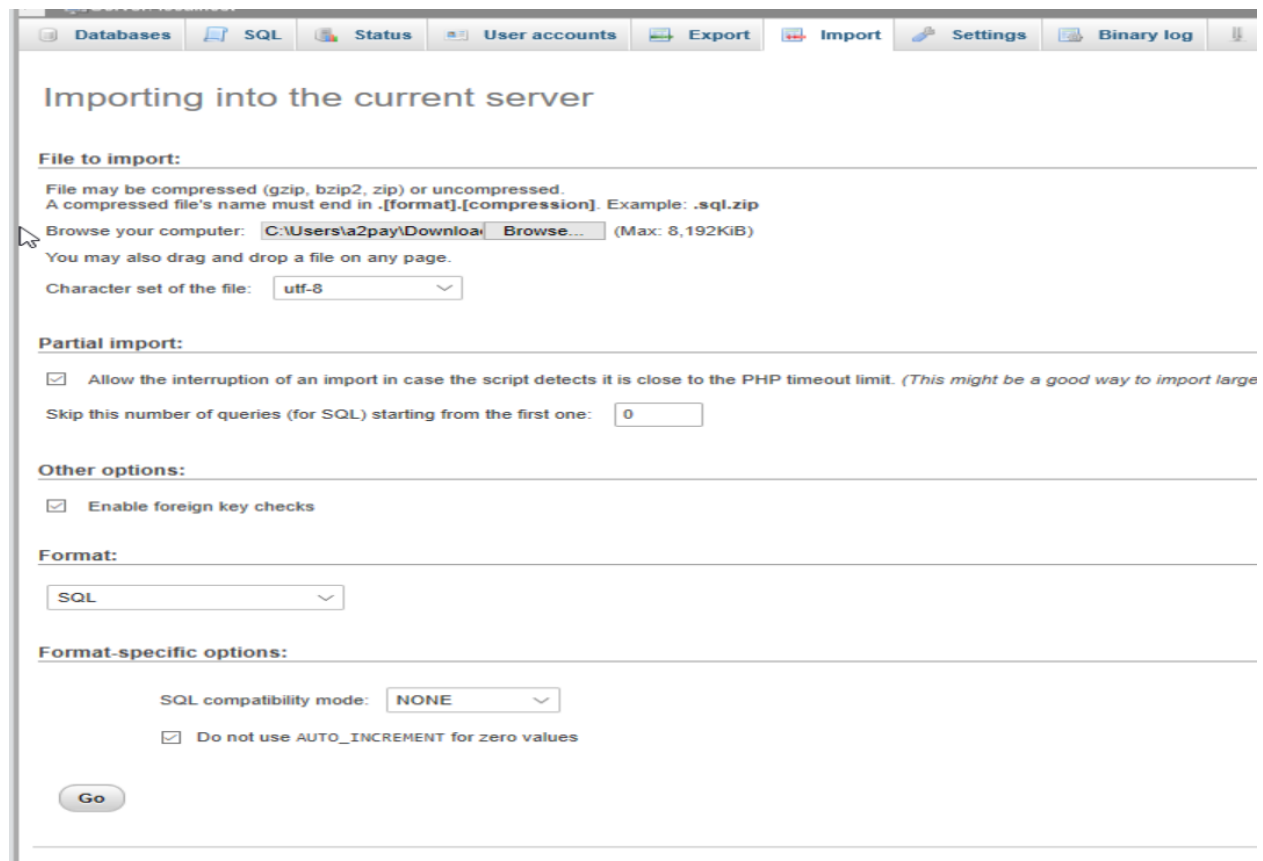

10. Dentro da base de dados criada iremos a seção importar e adicionaremos na opção adicionar arquivo nosso primer arquivo dentro da pasta sqlConfig chamado CinemaPIMStrucure.sql

11. Damos click no botão Go e a nossa base de dados foi criada.

12. De novo na seção importar adicionamos o arquivo CinemasPIMData.sql , clicamos no botão go e agora nossa base de dados tem as informações base do aplicativo.

Nessa base contemos usuários, clientes, salas, filmes e endereços padrão do app. Pode ser modificados com a manipulação da base de dados com ajuda de seu técnico TI.

13. Na pasta de projeto vai seguir o caminho bin/Release e executa o arquivo CinemaPIM.exe e já tem seu app rodando corretamente.
